The image features a brick wall background with a large, stylized logo for 'ClearOne'. The logo consists of the word 'ClearOne' in a bold, white, sans-serif font with a black outline. The letters are set against a dark, irregular shape that resembles a speech bubble or a stylized 'C'. This shape is surrounded by various graffiti-style elements, including splatters of pink, orange, and blue paint, and abstract brushstrokes in black and white. A registered trademark symbol (®) is visible to the right of the word 'One'.

ClearOne®

Unified Communications

- ClearOne offers cameras for collaboration and conferencing.
- Unite 20 - FullHD, USB 2.0, 120-degrees field of view,
- Unite 50 - 4K resolution, electronic PTZ, 120-degree lens, Zoom-certified
- Unite 150/200 - PTZ cameras, 255 presets, Zoom-certified

- Speakerphones with echo cancellation, First Microphone Priority from 1-2 users to 15-16 people in one room.

- Versa 50/150 for PC - compatible with any application: Zoom, Webex, MS Teams etc.
- Included: 4K or FullHD camera, Chat 150 speakerphone and Versa hub.
- Versa hub allows one USB 3.0 cable connectivity to PC, supports 2 monitors (for video and presentation), Ethernet network pass-through for laptop.
- Daisy-chain another Chat 150 for a room of up to 15-16 people.

CONVERGE Huddle for huddle rooms

ClearOne[®]

- Huddle - a small sound mixer with PC connectivity, HDMI output, camera input.
- Perfect for small and medium-sized rooms.
- Support for any video application on PC or local presentations.

- Versa Pro 50 - a ready-to-use bundle for all PC-based collaboration and local presentations.
- Includes: Unite 50 camera (4K resolution, ePTZ, 120-degree field of view), ceiling microphone, Converge Huddle DSP.
- Perfect for smaller rooms - up to 12 people.
- A very competitive price.

- Versa Pro 150 - connect your laptop for collaboration or local presentations in a medium-sized conference room
- Includes: Unite 150 camera (12x optical zoom, 72.5-degree field of view, 255 presets), ceiling microphone, Converge Huddle

- Versa Pro CT - Huddle with the BMA CTH drop-ceiling microphone.
- Just add a Unite 50/150 camera and loudspeakers (8 Ohm).
- Loudspeakers can be connected to BMA CTH as it has a built-in amplifier.
- 3 months of free Collaborate Space collaboration system, but also works with any PC application.
- Works great with Bluetooth Expander.
-

- + Pair your phone or tablet with Converge Pro 2 or Huddle.
- + Bi-directional Bluetooth 3.0 connection - you will speak to Converge Pro 2 / Huddle microphones and hear from loudspeakers instead of the phone / tablet.
- + You can bridge your phone call with the videocall on your PC.
- + Pair via NFC or traditional Bluetooth.
- + Range up to 45 meters.

CONVERGE Huddle for audio conferencing

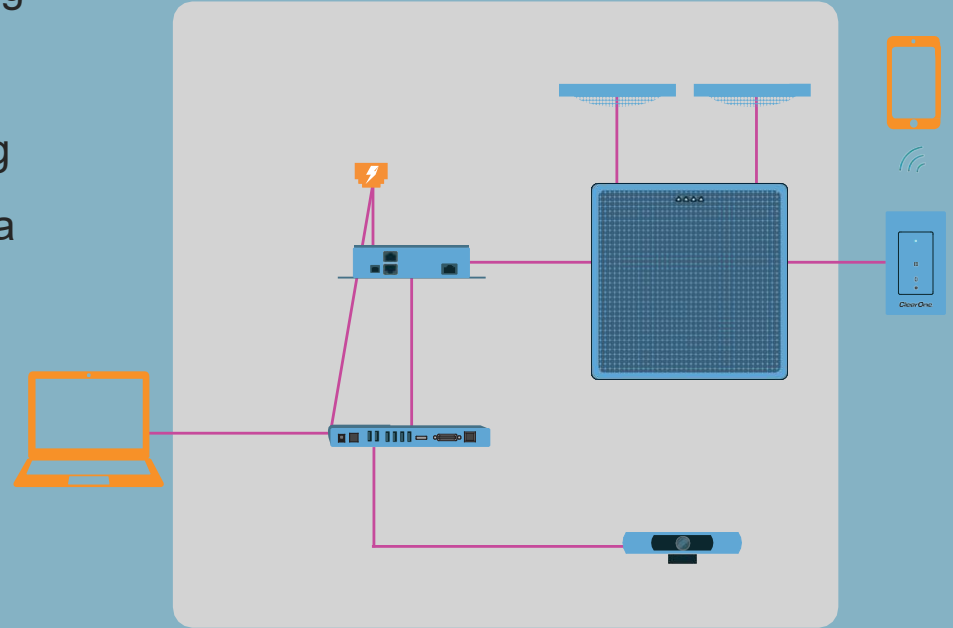

Versa Lite CT - ceiling tile mic with USB connectivity

- + Ceiling tile beamforming microphone with USB connectivity.
- + No DSP required => much lower costs.
- + Audio processing - on the BMA CT.
- + Add loudspeakers - directly to the BMA
- + Add a ClearOne Unite camera and a Bluetooth Expander (optionally)
- + Connect to a PC or a USB hub.
- +

Versa Room CT - just connect a PC

- + The USB-enabled ceiling tile beamforming microphone with all accessories
- + Includes: BMA CT, USB adapter, 2 ceiling speakers, Versa hub, Unite 50 4K camera
- + No DSP required => much lower costs.
- + Connect to a PC or video terminal.
- + Add a BT Expander optionally.
- +

BARCO

The image features a dark brick wall background with colorful graffiti in shades of pink, orange, and grey. The word "ClearOne" is written in a bold, white, sans-serif font with a black outline, positioned centrally. A registered trademark symbol (®) is located to the right of the word. Below the logo, a blue rectangular box contains the text "Video conferencing" in white, bold, sans-serif font.

ClearOne®

Video conferencing

- Live 200 - for rooms up to 6-8 people, terminal SIP/H.323, 4K camera, Chat 150 speakerphone
- Live 300 - for rooms up to 6-8 people, terminal SIP/H.323, FullHD camera with 12x optical zoom, Chat 150 speakerphone
- Live 600 - up to 15-16, terminal SIP/H.323, built-in MCU expandable to 9 locations, FullHD camera with 12x optical zoom, Chatattach 150 speakerphone
- Live 900 - up to 25 people, terminal SIP/H.323, built-in MCU expandable to 9 locations, FullHD camera, Converge Pro 48V/T DSP and BFM 2 microphone array
- Live 1000 - Live 900 with BMA Ceiling Tile microphone array

The image features a dark brick wall background. In the center, the word "ClearOne" is written in a bold, white, sans-serif font with a black outline. The text is surrounded by abstract, colorful paint splatters in shades of pink, orange, and grey. A registered trademark symbol (®) is located at the end of the word. Below the main text, there is a blue rectangular box containing the text "COLLABORATE Space" in white, bold, sans-serif font.

ClearOne®

COLLABORATE Space

- COLLABORATE Space is a suite with a full suite of audio, video and meetings tools.
- It connects hundreds of users for voice and video calls, channels, chats, file sharing.
- In meetings participants can share data, chat, record sessions, use an interactive whiteboard and annotations.
- COLLABORATE Space allows phone calls to any phone number in the world directly from the application and even bridge them into meetings.
- Support for legacy systems with SIP/H.323 gateway connections.
- webRTC access for all popular web browsers - no need to install any plug-ins.
- Capability to initiate Space meetings directly from MS Teams.

- COLLABORATE Space is available as a cloud-based service or on-premise.

A graffiti-style logo for 'ClearOne' is painted on a dark brick wall. The word 'ClearOne' is written in a bold, white, italicized sans-serif font with a thick black outline. The letters are set against a background of abstract, colorful brushstrokes in shades of pink, orange, grey, and white. The overall style is urban and artistic.

ClearOne®

CONVERGE® Pro 2

- + Sound processors to connect multiple sources to multiple outputs.
- + Sources: microphones, video terminals, PCs, media players etc.
- + Outputs: amplifiers, PCs, recorders, loudspeakers.
- + Superb audio processing for local reinforcement, audio conferencing, video conferencing etc.
- + Superb platform for peripherals such as beamforming microphones, wireless microphones.
- + Users can even manage lights from Converge Pro 2, combine / divide rooms etc.

CONVERGE® Pro 2 – Scalable with flexible connectivity **ClearOne**

- + Stack up CP2 units together up to 144 mic/line inputs (or 12 units)
- + One Converge Pro 2 can manage several rooms as separate zones with independent resources (microphones, loudspeakers, VoIP lines, USB ports for PCs)
- + New expansion bus “**C-Link**” between Converge Pro 2 at 45-meter distance
- + New peripheral bus “**P-link**” to connect - 60 meters between devices (microphones, USB expanders, Bluetooth Expander etc.)

- + Up to 3 of each device type
- + Supported peripheral devices
 - Beamforming Mic Array 2
 - USB Expander
 - GPIO Expander
 - DIALOG 20 Wireless Receiver
 - Bluetooth Expander (only 1 in a daisy chain)

- + Superior performance with most advanced echo cancellation, noise cancellation up to 25 dB.
- + Support for both small systems (one mixer for several rooms) and large systems (up to 12 mixers in one stack).
- + Multiple VoIP lines for independent calls.
- + Optimized to work with Beamforming Mic Array, BMA CT and DIALOG 20 Wireless Mics.
- + Management via Touch Panel Controller or a free Dialer application (Windows/MacOS/Android/iOS).

Beamforming Microphone Array 2

+Up to 3 Beamforming Mic Array 2 per one CONVERGE Pro 2 DSP

+Beamforming Mic Array 2 does not take up any analog ports on CONVERGE Pro 2

+BMA sets up an acoustic beam towards the speaker while the speaker can move around the conference room

+200 meters between BMA 2 when only BMA 2 connected

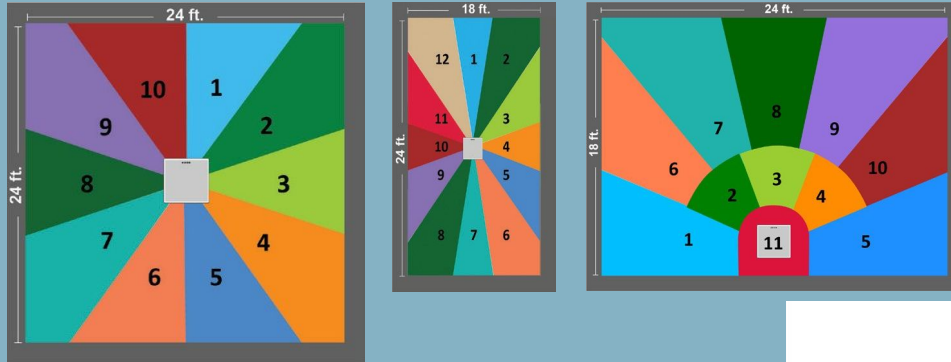

- + Daisy chain up to 3 BMA CTs to one Converge Pro 2 DSP.
- + BMA Ceiling Tile supports a long-distance P-Link mode - up to 200 meters between a DSP and a microphone and between microphones.
- + Built-in amplifier 2 x 10 Watt allows to connect loudspeakers directly to BMA CT.
- + Drop ceiling grid ready - 600 mm x 600 mm, 625 mm with adapter
- + Available hard-ceiling mounting options (surface, recessed installations) as well as a VESA mount bracket.

- + BMA 360 - The world's first truly wideband, frequency invariant beamforming mic array with uniform gain response across all frequency bands
- + 6th generation Acoustic Echo Cancellation (AEC)
- + On-board audio algorithms, like noise reduction, filtering, and Automatic Level Control, eliminate the need for per-beam processing in a DSP mixer - requiring fewer DSP mixer resources.
- + Camera tracking possible with beam reports.
- + Built-in amplifier 4x15W (2 x 30 Watt bridged) allows to connect loudspeakers directly to BMA 360.

- + Easy adjustment to room sizes.
- + Daisy chain up to 3 BMA 360 to one Converge Pro 2 DSP.
- + Drop ceiling grid ready - 600 mm x 600 mm, 625 mm with adapter

- + Ceiling mounted microphone, both analog and Dante
- + 3 uni-directional microphones with range 70 Hz - 20 kHz in one enclosure
- + Each mic is numbered (I, II, III) - for easy identification
- + LED diods - status On/Mute
- + 100% immune from RF interference
- + Adjustable length of drop-down cable - 0-2.1 meters from ceiling.

The image features a brick wall background with a large, stylized logo for 'ClearOne'. The logo consists of the word 'ClearOne' in a bold, white, sans-serif font with a black outline. The letters are set against a dark, irregular shape that resembles a microphone or a stylized 'C'. The background of the logo is filled with various colors: pink, orange, and grey. There are also some white and blue splatters around the logo, giving it a graffiti-like appearance. A registered trademark symbol (®) is visible at the end of the word 'One'.

ClearOne®

Wireless microphones

- + Receiver (with built-in dipole antenna)
- + Microphones (handheld, belpack, goose-neck, tabletop)
- + Charger (for 4 types of transmitter), but a USB charger will be OK, too.

- Very low latency, high quality digital signal, 256-bit encryption
- 4 or 8 channels in receiver, up to 32 channels in one system
- frequency ranges: 500, 550, 586 MHz,
- Microphones: handheld (condenser, dynamic), tabletop (directional, omnidirectional), goose-neck (15, 30, 45 cm), beltpack.
