

Collaboration that clicks

Together, Nureva and Barco provide an easy-to-use, platform-agnostic wireless conferencing system with clear and reliable audio performance that's perfect for any meeting space.

Barco ClickShare Conference makes it easy for people to host meetings from personal devices, creating a highly flexible "bring your own meeting" (BYOM) experience. Nureva® audio conferencing systems provide adaptable audio, using patented Microphone Mist™ technology for full-room coverage. With Nureva and Barco, spontaneous meetings aren't delayed while logging in. No one has to huddle around a conferencing telephone at a table. And remote users hear every word.

A better experience for everyone

For meeting participants

- Easily host meetings in any space using your own device and any UC&C platform
- Wirelessly connect to in-room audio, camera and display
- Be heard from anywhere in the room, regardless of your location or the direction you face
- Avoid the need to touch screens, microphones or remotes

For IT staff

- Easily install a Nureva audio system and connect it to a ClickShare unit
- Reconfigure spaces with no need for manual system adjustments thanks to Nureva audio's continuous autocalibration
- Avoid IT tickets and hassles with reliable, trouble-free performance
- Stay flexible with a range of solutions that work in a variety of meeting spaces

A complete solution for flexible meetings

By combining Nureva audio and Barco ClickShare Conference, meetings can happen anywhere with no need to compromise on the remote listening experience.

Nureva audio

Full-room coverage

Fill your spaces with thousands of virtual microphones, thanks to patented Microphone Mist technology.

Continuous autocalibration

Stay flexible with audio that easily adapts to changing room configurations and seating arrangements.

DIY installation

Install a system in 30 minutes or less (60 for the Dual HDL300) – no specialized technicians required.

ClickShare Conference

Collaborate in seconds

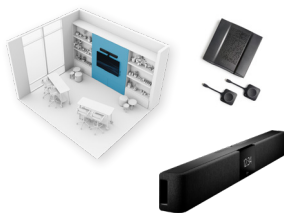

Quickly start a meeting using your own device without the hassle of cables or a meeting room PC.

Bring your own meeting

Easily share your display, plus access a range of other BYOM collaboration options for an immersive meeting experience.

Triple agnostic

Connect your device with in-room display, audio and video peripherals, using your preferred conferencing platform.

Small spaces
